Description: Farm Sanctuary has many opportunities for dedicated people who want to lend a helping hand to farm animals. Shelters provide individuals with unique opportunities to advocate for and connect with farm animals, establish community with like-minded people, and acquire valuable knowledge of the various facets of animal protection. Whether it's organizing a walk-a-thon in your community, writing letters to legislators, doing a 1-3 month shelter internship or joining our full-time staff, there is something for everyone who wants to do their part to end farm animal suffering.
