IDP 250  
20-23 January 2009  
1 credit, S/U only

Course Overview:  
Transform an idea into a set of sketches, a computer model, and a working prototype.

Course Learning Objectives:  
• Gain experience with sketching  
• Improve ability to visualize objects/designs  
• Improve ability to communicate design intent  
• Increase understanding of basic materials and manufacturing processes  
• Complete a physical prototype/model

Student Feedback:  
“This course was definitely time well spent. I learned a lot.”  
“It was the best credit I’ve earned at Smith.”  
“This course exceeded my expectations.”

Special thanks to Greg Young and Dale Renfrow and the Center for Design and Fabrication
