ARE YOU IN THE GPA “BALL PARK” FOR THESE FELLOWSHIPS?
The fellowships listed above are highly competitive. GPAs required to win awards will, in general, be very high. Here are some rough guidelines about the GPA “ball parks” of fellowships listed. If you are in the ball park, then explore these fellowships and talk with advisors in more detail about whether it is worth investing your time in pursuing them. Note: At the lower end of the GPA range, you’ll need to show compensating strengths in other areas valued by the particular program or foundation; award winners typically have GPAs high in the range.
