**Product Information**

**ChemDraw Prime**

*You may not need to activate!*

If prompted for an activation code, please do the following:
- Go to Order History tab on the left navigation pane
- Click on applicable order #
- Scroll down to the activation code on the right side

Please open the "ChemOffice Suite Of Products Chart" to view specific product features.

Select a version. To access older versions, click on the Prior Versions tab.

</table>
For the Mac version, find “ChemOffice Professional” and click the cd200.dmg (or similar) link on the right.

**Leave this browser window open**, you’ll need it again in a minute!

### Product Download

**ChemDraw Prime**

If you select multiple files and click the Download Selected Files button and get an error, the error is due to your company's firewall blocking the download of the Download Manager. Please contact your local IT group to allow the download of this application or alternatively, you can click the hyperlink next to each file to download each individually.

Once saved on your computer you can double click the “cd200.dmg” file to open it and to get the final installation started.

Agree to the terms, and drag the program to the applications folder.

ChemDraw should now be available as an application in your computer. You can now close the pop-up windows, and click on the application to launch it. The program will ask you to activate.
To get your activation code, go back to the Perkin Elmer website and click on Order History.

Click the order with the most recent Order Date.

The activation key will be on the bottom right of that order page.

Copy and paste the code into the ChemDraw Installer Window that appeared asking for it, then click Activate in that window.
After clicking on Activate. It returned: Success!! ...and warned me about the creation of some folders for ChemDraw to properly work. Agree to that. Now it is ready to draw!
