Remote Teaching and Learning 2020 Curricular Partnership Offer

CEEDS is excited to continue our offer of traditional and non-traditional support and partnership for teaching and learning at Smith.

In addition to our Curricular Enhancement Grants we can support or partner with you in a number of ways to help reduce your prep and teaching load.

Send an email or give a call and we would be happy to brainstorm ways CEEDS staff can help deliver great learning opportunities to your students.

Ways we have helped faculty:

- Co-producing amateur videos (with closed captions) of topically relevant videos to support asynchronous learning. See an example [here](#).

- Virtual tours that are content specific on campus or in the greater Connecticut River Valley such as local farms, energy systems, and businesses (e.g. Mill River, Barstow Farm, Northampton wastewater treatment plant, and Holyoke Dam and hydroelectric facilities). We can film you or others at one or multiple locations and provide video editing.

- Identifying and securing guest speakers on content specific topics at the intersection of your expertise and sustainability, including data science, psychology, government and policy, economics, film, indigenous studies and much more.

- Identifying or recommending data sets and text or media materials to support your assignments

- Supplying real campus or community challenges or opportunities to be used as case studies or problem prompts for course work.

- In-course student support for individual or group work. For years CEEDS has supported courses such as Interpreting and Communicating Environmental Information, Psychology of Climate Change, and Critical Design Thinking by supplying project prompts, advising, professional support, and more.

- Guest speaking in your course/event or event series about topics such as carbon neutrality policy and engineering strategies, impacts of pricing models for waste disposal and water consumption, sustainable purchasing and construction practices, other campus sustainability topics.
We look forward to working with you!
